

# X4ITS – Central Europe Cross Border Cooperation for ITS

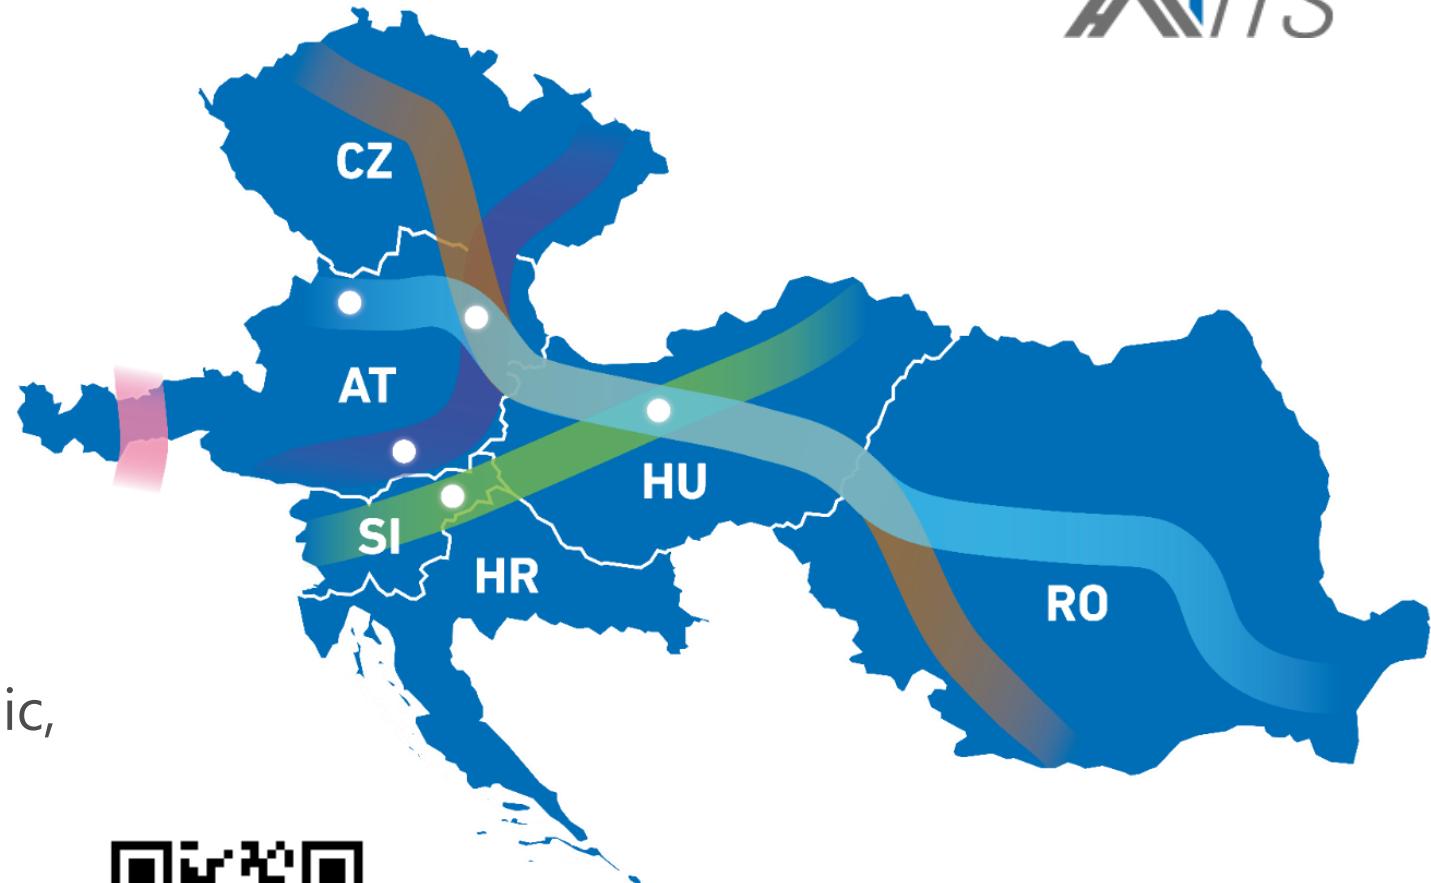

Cross-Border Harmonisation of ITS and C-ITS Services  
Presented by Max Panczyk (AustriaTech)

Co-funded by  
the European Union

# About X4ITS

- Call CEF-T-2022 SIMOGEN
  - Follow up of CROCODYLE
- Runtime 2023 - 2027
- Budget 64.5 Million €
  - EU contribution 50%
- 6 Member States – 28 Partners
  - Austria, Croatia, Czech Republic, Hungary, Romania, Slovenia

# Objectives

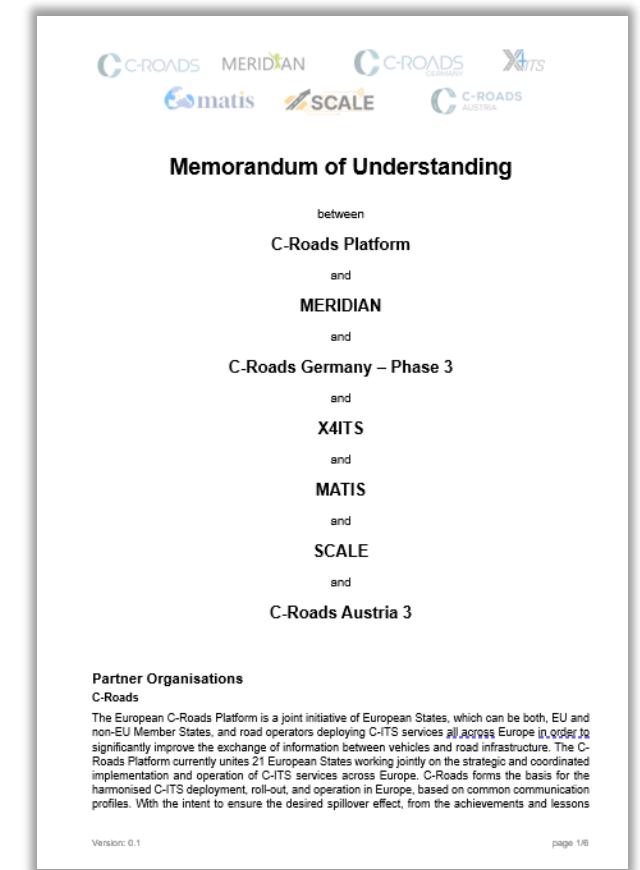

*Overall goal: improved cross-border **cooperation**, deployment project*

- Improve **cross-border** traffic and transport
- implementing **harmonised and synchronised** ITS applications (high level road network)
- Increased focus on secondary road network and multimodality
- Availability of data and optimised **data exchange**
- Implementing C-ITS use cases in urban areas linked to high level road network

# Cooperation

- Close contact to organisations and cities in the project
- Cooperation with other corridor projects (C-Roads, MERIDIAN & MATIS):
  - Joint workshop and presentations at NAPCORE Mobility Data Days 2024
  - Regular cross-corridor meetings every quarter
  - Signed MoU with C-Roads, MERIDIAN, MATIS, SCALE (ITS Conference Sevilla 2025)
- Consideration of C-Roads specifications / inclusion of X4ITS use cases at C-Roads user meetings
- Consideration of NAPCORE recommendations regarding requirements for National Access Point (NAP) upgrades

# Harmonisation of ITS and C-ITS Services

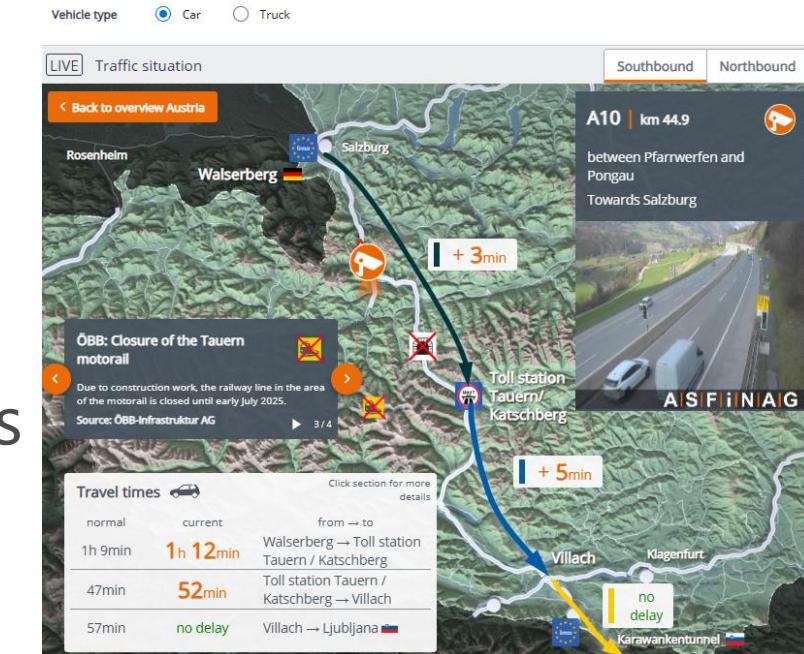

Cross-Border Harmonisation and Alignment

Co-funded by  
the European Union

# Cross-Border Harmonisation Matters

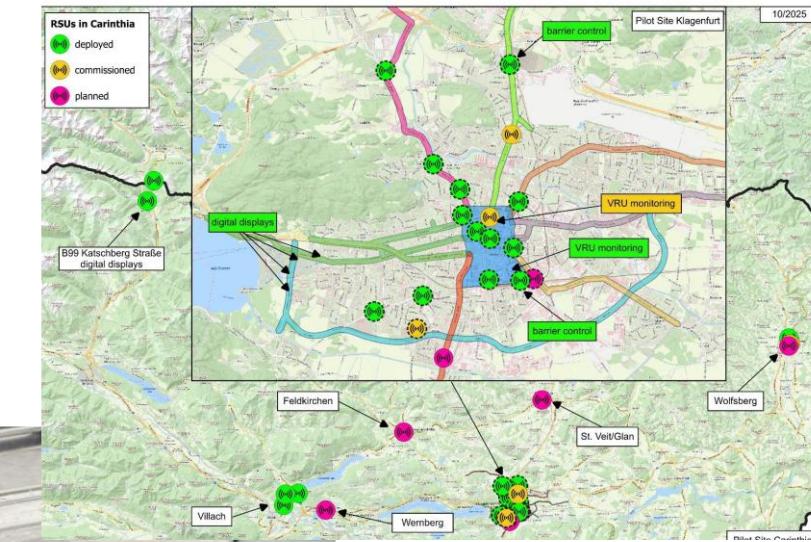

- Achieve interoperability of C-ITS systems along European transport corridors
- Align technical and organisational deployment activities across participating countries
- Deliver consistent, reliable information services to end users
- Implementations follow C-Roads Platform technical specifications
- Compliance with NAPCORE guidelines for upgrading NAPs
- Use of DATEX II as the common standard for ITS data exchange

[asfinag.at/reisezeiten](http://asfinag.at/reisezeiten)

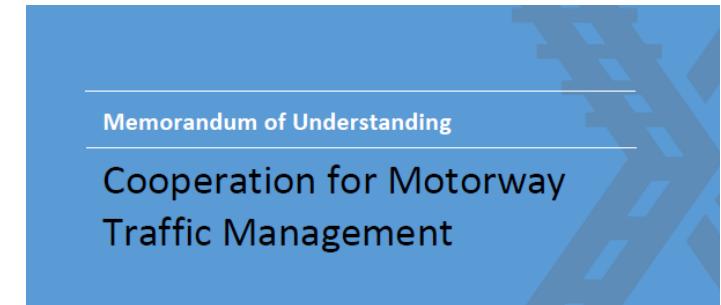

# ITS and C-ITS Implementations

- Linking secondary roads and urban nodes with the TEN-T core network
- C-ITS use cases in urban areas to include public transport (prioritisation)
- Supporting multimodal mobility and integrated traffic management

# Cross-Border Traffic Management

- Implementation of Traffic Management Plans (TMPs) for coordinated operations
- TMPs enable data sharing across borders
- MoU of Motorway operators
  - Cooperation and exchange of traffic information
- Upgrading NAPs including coverage of secondary road networks

# Outlook

## **Deliverables:**

- Evaluation recommendations developed for partners
- Requirements of NAP upgrades defined
- Second Progress Report

## Video:

<https://www.youtube.com/watch?v=zbV7zzJ84lo>

## **Milestones:**

- Cross-border data and information exchange
- Upgrade, improvement, or development of end-user services
- C-ITS installations
- Upgrading NAPs and DATEX II nodes
